-Low battery indicator
-Motorized locking system
-Emergency opening and security management tasks with the CEU
-Security Management Software
-Cross Key override

DIMENSIONS

7.87 INCHES H
20 INCHES W
15 INCHES D

CEU

Computerized Emergency Unit (CEU)

Compatible with all our safes, the Computerized Emergency Unit (CEU) has been designed to open a safe in case of emergency and to perform security management tasks.

If there is any suspicion of theft from a safe, the unit can detect and download the safes last 400 events, including the Hotel name, room number, employee's name and ID, date & time of each event and the date of the print out. This dramatically reduces fraudulent liability claims, saving both time and money.
